

# PolarSuite 7.1

## Introducing PolarDispatch

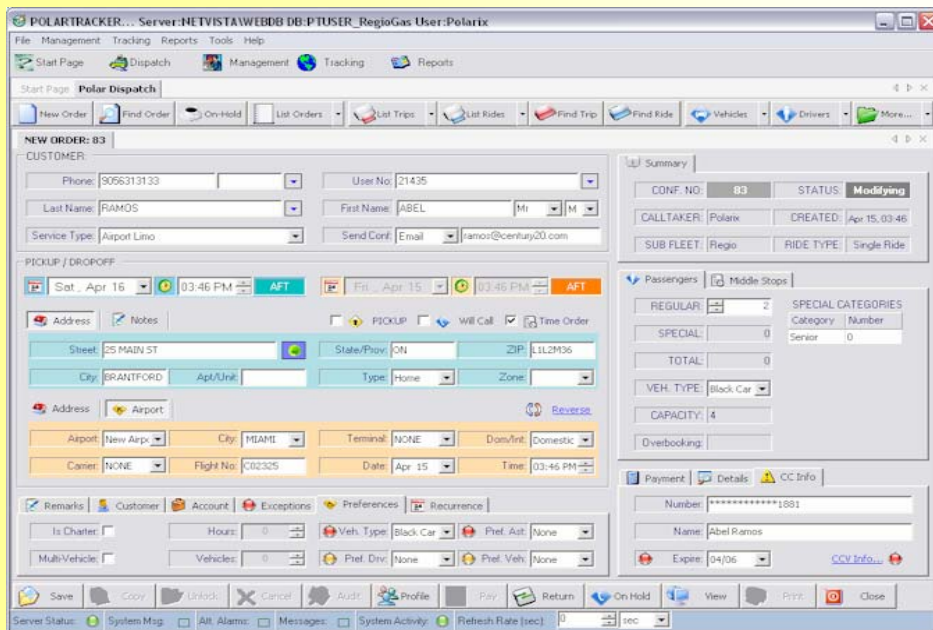

Web Browser Map Locator

Service Type Editor

PolarDispatch is the most recent addition to PolarSuite. This module has been completely redesigned from scratch to integrate Reservation and Dispatching features with the existing Automatic Vehicle Location (AVL), Fleet Management and Report Viewer components of the software suite.

PolarDispatch has been conceived as a flexible framework that grows with your business, instead of being a fixed program. It features a Service Type Editor for creating multiple services under the same system, Customized Reservation/Dispatching Screens, Multiple Map Windows, Crystal Report Viewer and Instant Quick Report Editor.

Customizable Reservation Screen

**Polarix delivers a legendary customer service. They are like your own software team.**

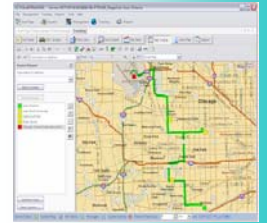

Kevin Foss,  
President of  
Executive  
Chauffeur,  
Chicago.
